 - Medical care services: -0.05 | -0.05 |-0.03
 - Transportation services: 0.05 | 0.06| 0.08
 - Airline fares: -0.01 | 0.04 | 0.02

Yearly Contributions to 5.0% Headline CPI Breakdown

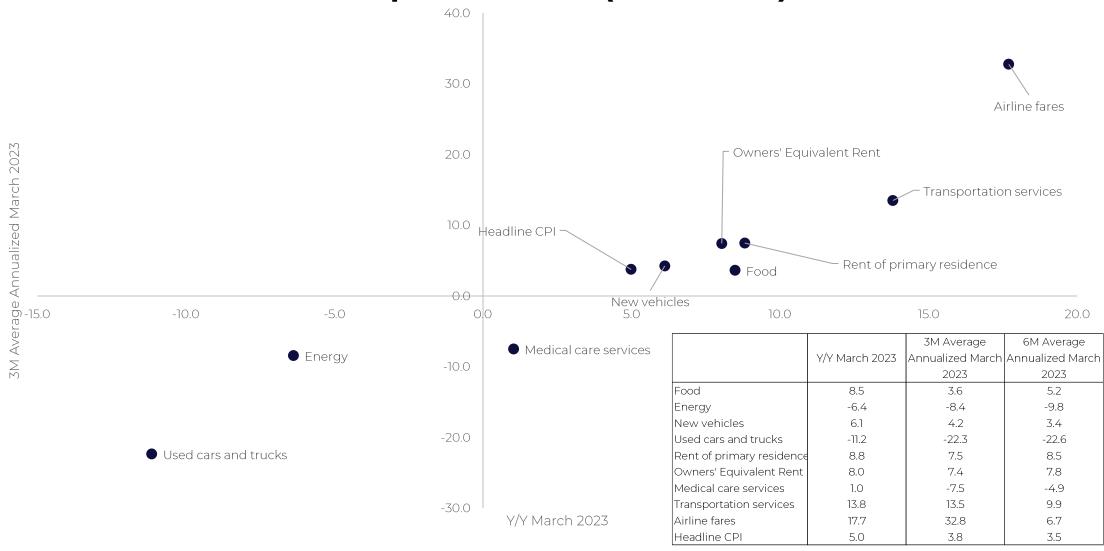

- January | February | March Yearly Contributions:
 - Food: 1.15 | 1.28 | 1.37
 - Energy: -0.44 | 0.34 | 0.58
 - New vehicles: 0.26 | 0.25 | 0.25
 - Used cars and trucks: -0.30 | -0.36 |-0.31
 - Rent of primary residence: 0.66 | 0.66 | 0.64
 - Owners' equivalent rent: 2.04 |2.04 | 1.97
 - Medical care services: 0.07 | 0.14 |0.20
 - Transportation services: 0.79 | 0.84| 0.84
 - Airline fares: 0.10 | 0.16 | 0.15

Headline Contribution Of CPI Core Less Shelter Deceleration

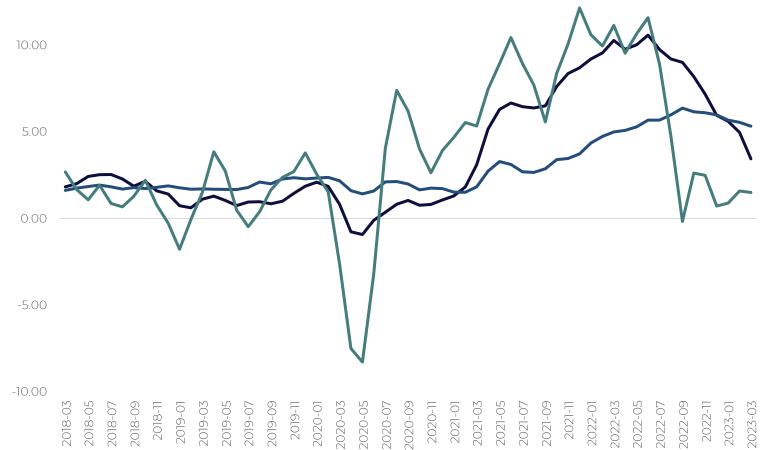

- As one of the most important component, reflecting wage dynamics in the economy, Core CPI Less Shelter is crucial for the Fed's policy trajectory.
 - In March, the contribution to Headline CPI decelerated to 1.58%, down from 1.67% in February and 1.78% in January.

8 Out Of 9 CPI-Subcomponents Are Lower On A 3M Annualized Basis Compared To Y/Y (9/9 On 6M)

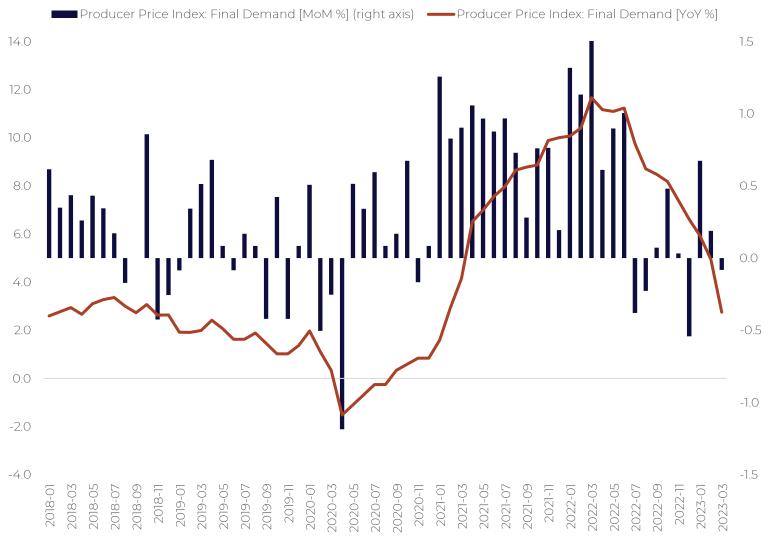

Headline Contribution Of CPI Less Shelter Deceleration

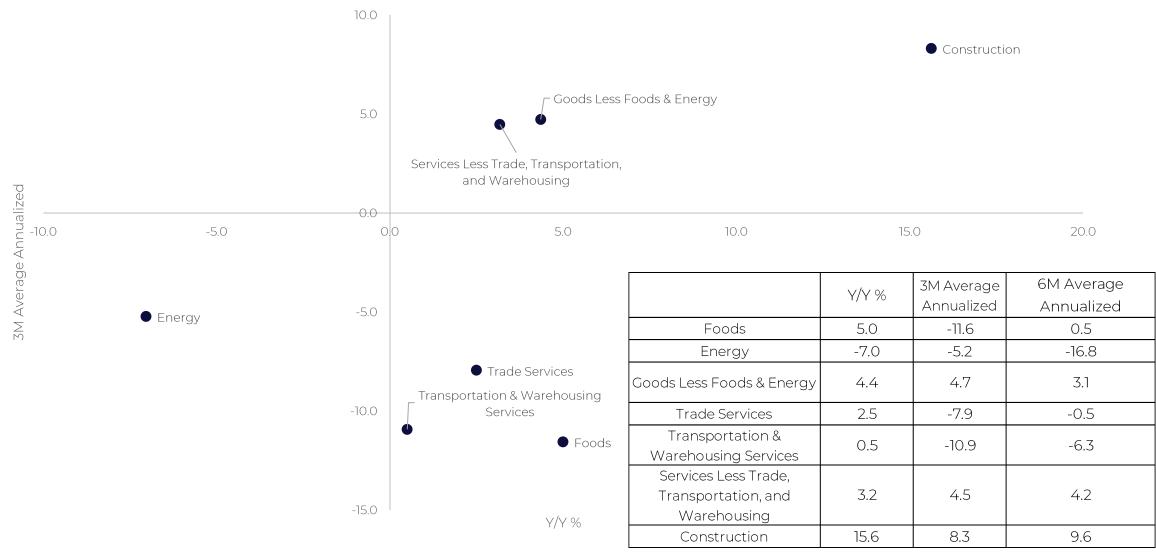

- Headline CPI Less Shelter decelerated to 3.44% Y/Y from 4.96% in February and 5.60% in January.
- Sticky CPI Less Shelter decelerated to 5.32% from 5.54% in February and 5.67% in January.
- Headline CPI Less Shelter 3M Average
 Annualized continues to remain low at
 1.50% compared to 1.58% in February
 and 0.88% in January.

PPI Deceleration To 2.7% In March

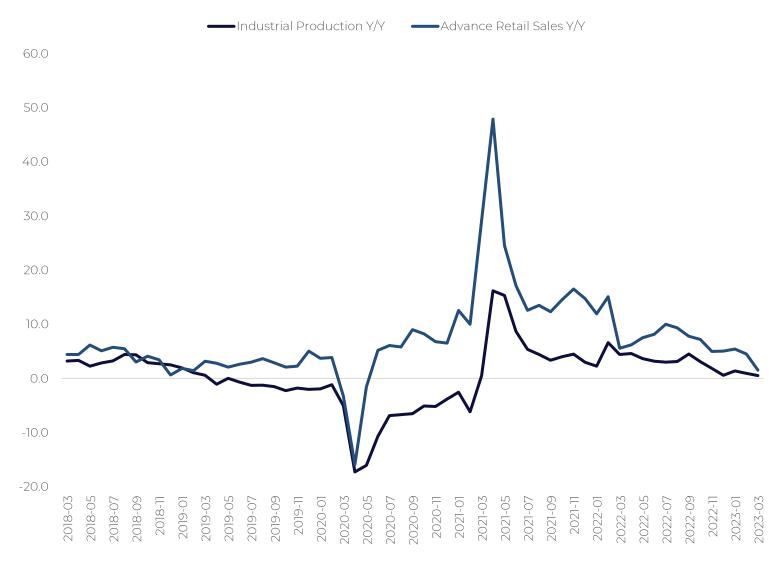

- Headline PPI decelerated to 2.7% in March compared to 4.9% in February and 5.9% in January.
- Monthly Headline PPI declined to -0.1% compared to 0.2% in February and 0.7% in January.

3/7 Subcomponents Are Lower On A 3M Average Annualized Basis Compared To Y/Y (6/7 On A 6M Basis)

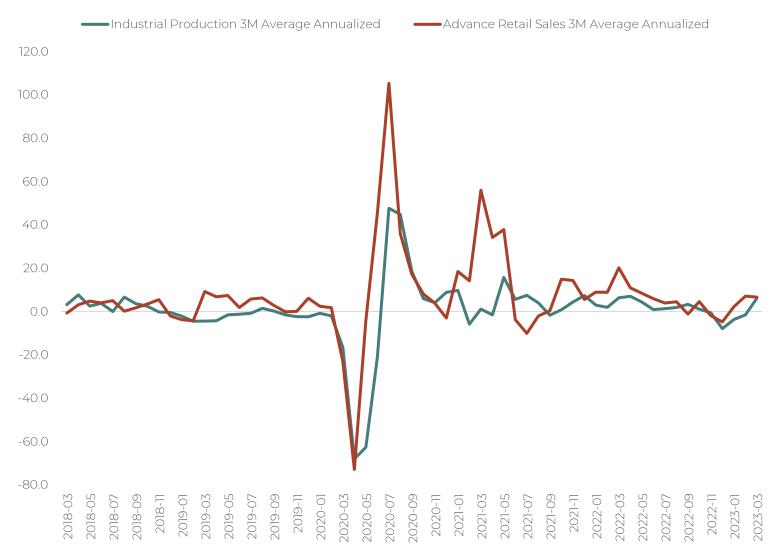

Advance Retail Sales & Industrial Production Decline

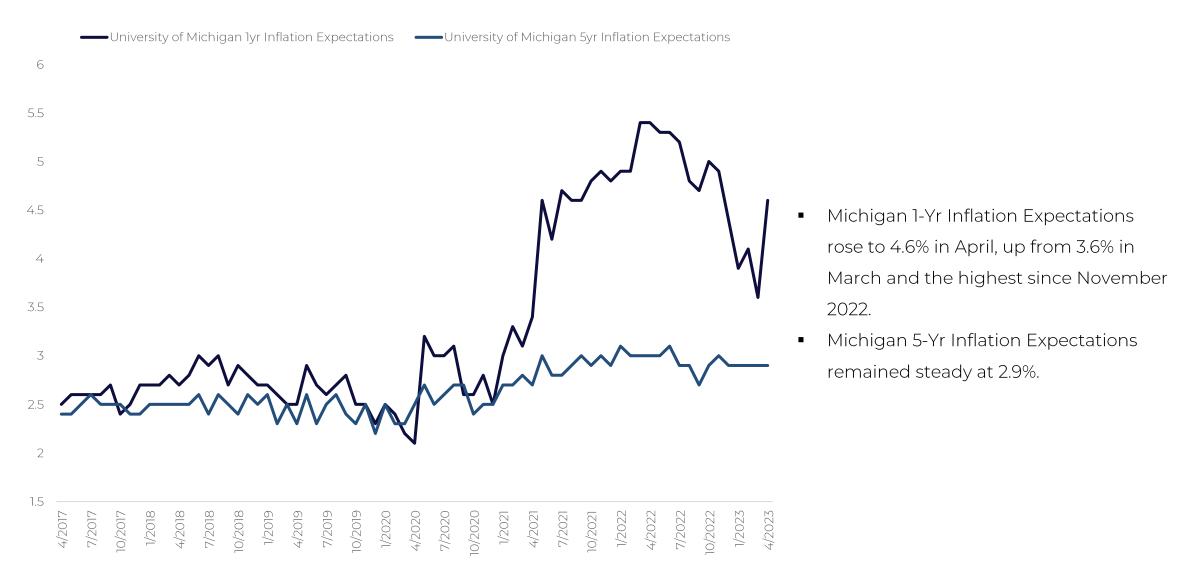

- Y/Y Advanced Retail Sales decelerated to 1.5% in March from 4.5% in February and 5.4% in January.
- Y/Y Industrial Production decelerated to 0.5% in March compared to 0.9% in February and 1.4% in January.

Advance Retail Sales & Industrial Production Decline

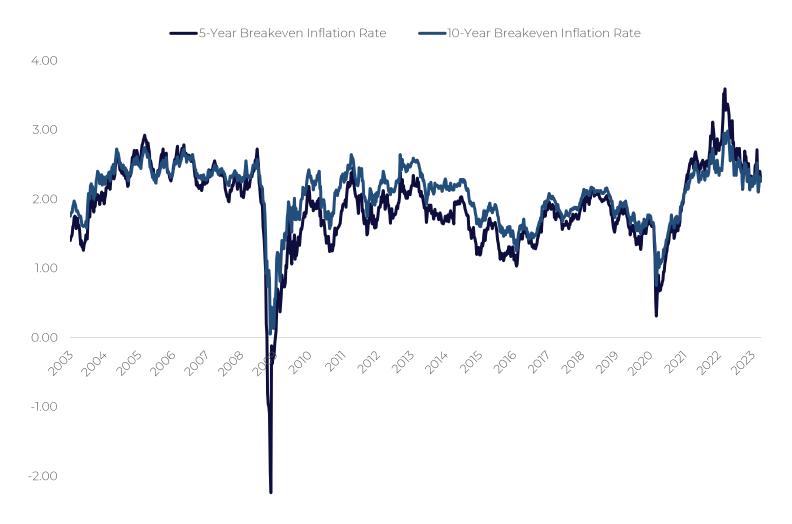

- 3M Average Annualized Advance Retail Sales remains high at 6.6% in March compared to 7.0% in February and 2.2% in January.
- 3M Average Annualized Industrial
 Production accelerated to 6.1% in March
 compared to -1.6% in February and
 -3.8% in January

Michigan 1-Yr Inflation Expectations Rose To 4.6% In April

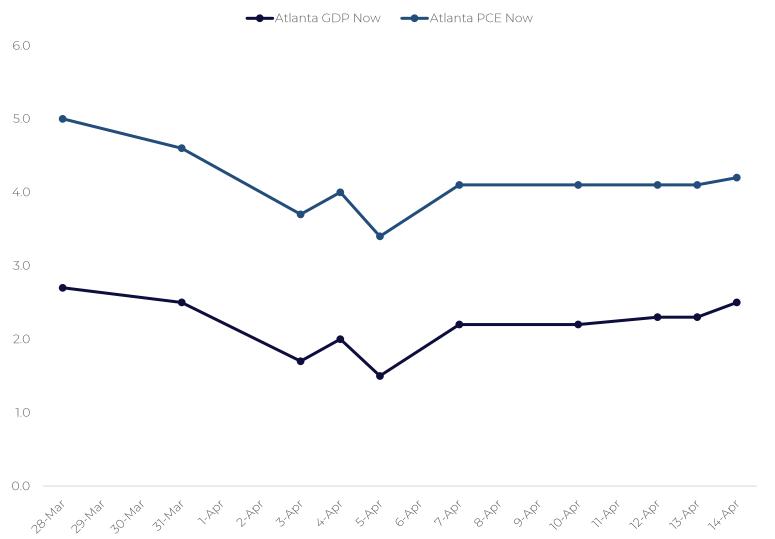

Inflation Expectations Over 5yr & 10yr Horizon In The Low 2s

- 5-yr Breakeven Inflation remains in the low 2s, sitting at 2.31% as of Friday.
- 10-yr Breakeven Inflation ticked up slightly on a week-to-week basis but remains in the low 2s at 2.30%.

Gold – Real Yields Relationship Flip?

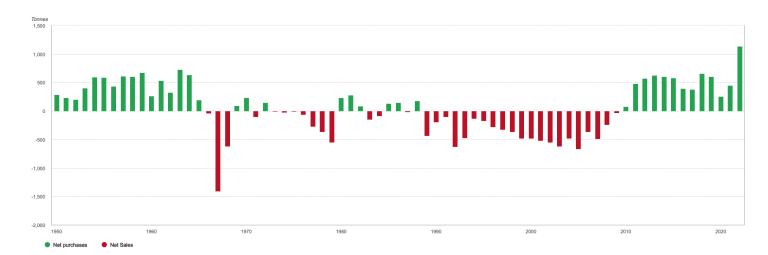

- Historically, U.S. real yields and Gold futures tend to be inversely correlated.
- Recently, that correlation has broken down.
- Potential reasons:
 - Structurally higher inflation with erosion of purchasing power.
 - Central Bank buying of Gold
 - Public sector debt issues

Sources: Bloomberg, Blue Line Capital, Blue Line Futures

Central Bank Gold Purchases

Global Copper Consumption Set To Double By 2035

 Copper consumption is expected to double from today to 2035 under climate scenarios.

Agnico Eagle Mines

A Hedge Against Currency Debasement

Agnico Eagle Mines Earnings Highlights & Stock Performance

Management Commentary From Q4 2022 Earnings Call

- Yamana Canada Assets & Abitibi Gold Belt: We're looking forward to the pending acquisition of Yamana's Canadian assets, including, most importantly the second the other 50% of the world-class Malartic Mine and all the potential that it has. Those 2 strategic deals, the consolidation of Kirkland and Agnica and the acquisition of Yamana's Canadian assets. Abitibi gold belt...it's a region about 160 by 200 kilometers. Minerals reserves over 30 million ounces, resources over 30 million ounces, inferred resources about 20 million ounces. These numbers are about the same as the total Nevada Gold Mine JV. We will be producing in excess of 2 million ounces from this region at about \$800 cash cost.
- <u>Kirkland Merger</u>: We did the merger with Kirkland. Leverage off our competitive advantage in
 what we think is one of the best places in the world as measured by geological potential and
 political stability.
- Detour Lake Production: We continue to have exceptional exploration results at depth, and moving west. We are continuing to assess and Natasha and the team have done a great job already with mill expansion. We think we can expand, and we're looking at opportunities to go from 28 million tons to 30 million tons with minimal CapEx. Permitting is up to 32 million tons.
- <u>Production & Breakeven:</u> So the bottom end of the quarter would have been 800,000 ounces, and that's where we came in this fourth quarter, at cost of \$863 per ounce. Not only did we increase reserves by 9%, but equally important, we increased mineral resources by 12%.

First Majestic Silver

Playing A Return To Higher Margins Amid Industrial Silver Demand

First Majestic Silver Earnings Highlights & Stock Performance

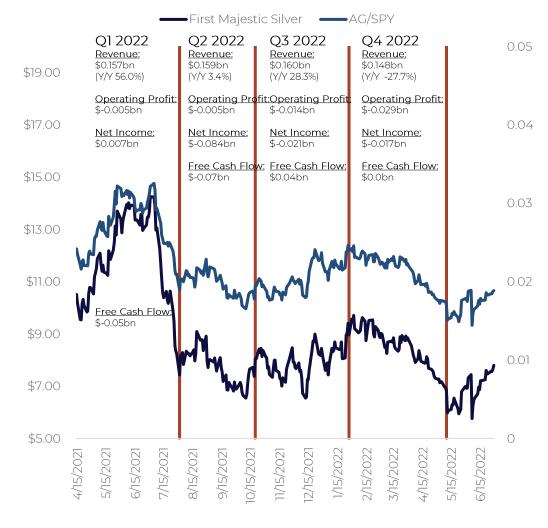

Management Commentary From Q4 2022 Earnings Call

- <u>Production:</u> First Majestic had a record 2022. We came in expecting to see a record and and we'll be seeing another record in 2023 as a result of increased gold production, we're expecting from Jerritt Canyon throughout the year. Q3 was really the best quarter of 2022.
- <u>Mine commentary:</u> We're now producing all the ore at Santa Elena through Ermitano mine. Santa Elena mine has been shut down for 2024 where Santa Elena is where we're doing some drifting exploration works and potential other development, and we're planning on bringing that back online in 2024, if all goes well.
- <u>Production:</u> For the year itself, we did produce a record, Silver-wise, 10.5 million ounces. The goal is really where we saw the big growth, with record gold production of 248,000 ounces of gold. We're estimating somewhere around 33 million to 37 million ounces of production (silver-ounces equivalent). Slightly north of 10 million ounces of silver and around midpoint, around 300,000 ounces of gold. So that's what 2023 is going to look like.
- <u>Jerritt Canyon:</u> At Jerritt Canyon for 2023, our mine grade is about 5.4 grams per tonne planned and the mill due to dilution impacts is 4.7. That's the current plan for 2023. At Jerritt Canyon, we had to mine quite a bit of random material as we developed through SSX and Smith mine.

Southern Copper

20 Years From Project Origination To Mine Production

Southern Copper Highlights & Stock Performance

Management Commentary From Q4 2022 Earnings Call

- <u>Production Disruptions In 2022:</u> Let me say that 2022 was a very challenging year for us. We faced some difficulties in the economies where we operate, which have tested our strength and ability to operate at competitive terms. On top of lower metal prices and inflation, we had to deal with the 54 days to a hundred stoppage in the first half of 2022.
- <u>Peru Disruptions:</u> The Peruvian Congress invoked its power under the constitution and removed President Pedro Castillo from office. Mrs. Dina Boluarte, the VP, immediately assumed the presidency these fast-moving events led to considerable upheaval, particularly in the south of Peru.
- <u>Copper Supply Demand:</u> The most relevant market intelligence houses for the copper market are expecting a small surplus for 2023. This assumes a growth in demand of about 2% 3%/year. Uncertainty regarding future production growth in Chile and Peru, which together represent about 40% of the global supply.
- <u>Copper Inventories:</u> Low copper inventories, which stood at 241,000 tons as of December 2022. These low inventories represent about 3.5 days of consumption, an extremely low level by copper inventories, I mean here, the addition of the LME, the COMEX, the Shanghai, and the bonded warehouses in China.

Quarterly Data

Southern Copper Leads On Reserves

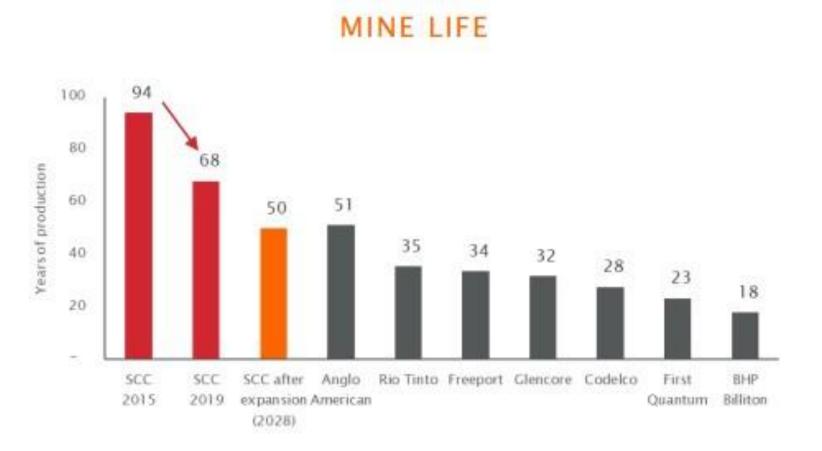

COPPER RESERVES AS REPORTED

- Southern Copper reports 44.8 million metric tons of reserves compared to Freeport in second place at 36.5 and BHP at 28.3.
- Higher reserves lend themselves to longer expansion cycles.

Sources: SCC IR, Blue Line Capital, Blue Line Futures

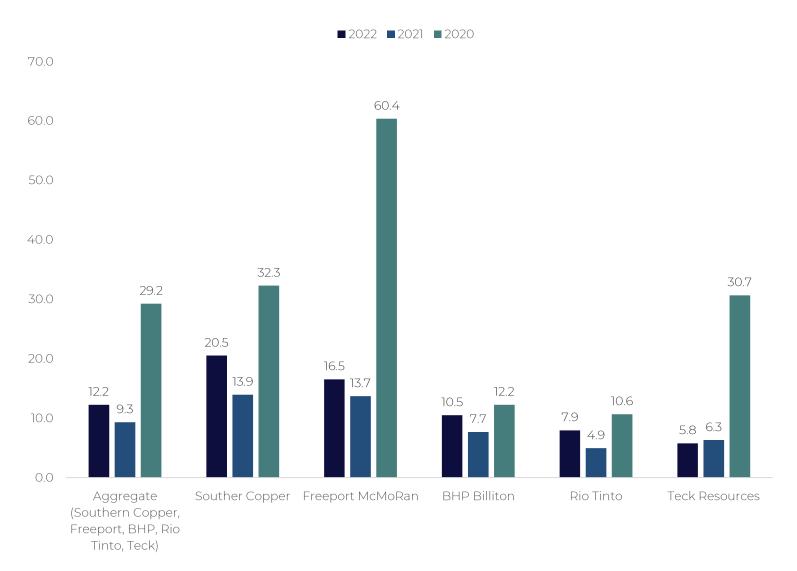

Southern Copper Also Leads On Mine Life

- Projecting expansions into 2028,
 Southern Copper expects to have 50 years of mine life compared to Anglo
 American at 51 and Rio at 35 years.
- Freeport only reports 34 of mine life with BHP at 18 years.

Sources: SCC IR, Blue Line Capital, Blue Line Futures

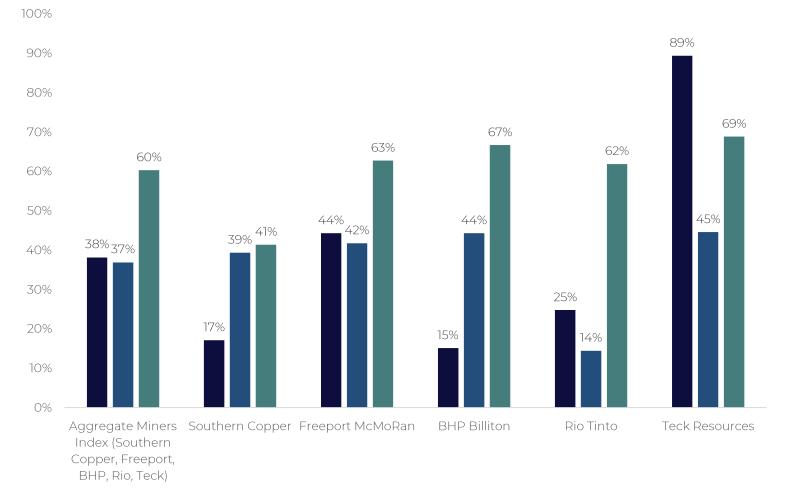

P/E Ratio Comparison

- Southern Copper's high quality mine life lends itself to an above-average P/E multiple
 - Southern Copper at 20.5 in 2022, compared to 13.9x a year prior.
 - The aggregate copper miner index at 12.2x in 2022 and 9.3x in 2021

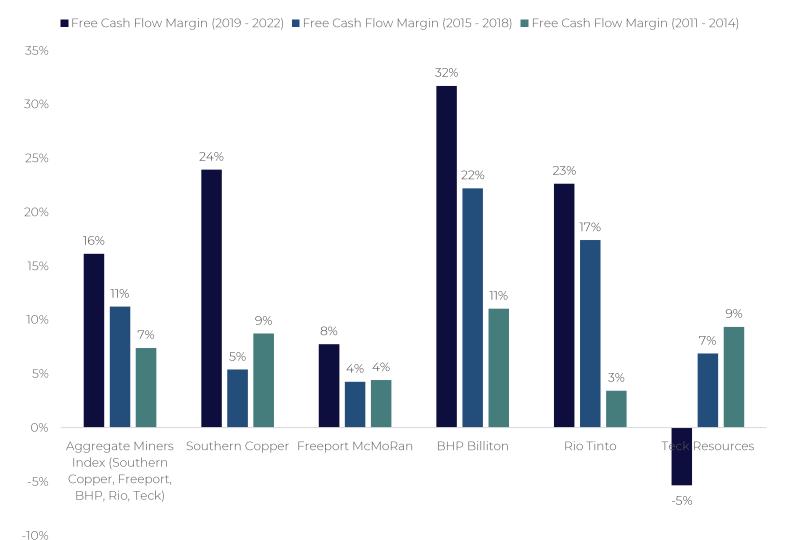

Below Average Reinvestment With Above Average Mine-Life

- Average CAPEX/EBITDA (2019 2022) Average CAPEX/EBITDA (2015 2018)
- Average CAPEX/EBITDA (2011-2014)

- Southern copper only reinvested 17% of its EBITDA, compared to Freeport McMoRan at 44% and peers in the aggregate at an average of 38%.
- This bodes well considering Southern Copper's high quality life mine and pipeline.

Below Average Reinvestment With Above Average Mine-Life

- Free Cash Flow yield at 24% in 2022 is above peers at 16%.
 - FreeportMcMoran at 8%, Rio Tinto at 23%.
- Closely watching the sustainability of those margins.
